

Shirley Tang

UX designer with an M.S. in Human Factors/UX, designing AI, enterprise, and accessibility-focused products. Combines interaction design and user research to create intuitive experiences for complex technologies.

Experience

Oracle – Redwood City, CA

UX Designer, Jul 2026 – Present

UX Design Intern, May 2025 – Aug 2025

- Drove the design for an AI-assisted nurse self-scheduling solution across multiple healthcare systems, translating complex operational requirements and user needs into a streamlined mobile experience and informing the HCM team's product direction
- Guided early-stage information architecture and navigation pattern exploration for enterprise agentic applications, establishing groundwork for accessing editable AI-generated artifacts

SJSU Behavior, Accessibility, and Technology Lab – San Jose, CA

Graduate Research Assistant, Jan 2025 – May 2026

- Designed and evaluated a multimodal haptic and auditory human-machine interface (HMI) for power wheelchairs, investigating how users respond to obstacle warnings
- Published 3 first-author conference and journal papers on human-machine interaction and multimodal interface design, spanning across accessible navigation, AI-assisted mobility, and remote driving

GoodMaps – Louisville, KY (remote)

UX Designer, Oct 2022 – Jul 2024

UX Design & Research Intern, Jul 2022 – Oct 2022

- Led the end-to-end product design from discovery, concept development, to launch of GoodMaps' B2C iOS/Android mobile app for accessible indoor turn-by-turn navigation
- Defined use cases, user flows, information architecture, and interaction patterns, and collaborated cross-functionally with engineering and internal stakeholders
- Created wireframes, high-fidelity prototypes, and functional specifications for screen reader accessibility to guide engineering implementation
- Surpassed quarterly Monthly Active Users (MAU) target by 250% through data-driven UX strategies aligned with user needs and business objectives

UCLA Human-Computer Interaction (HCI) Research Lab – Los Angeles, CA

UX Designer, Jan 2022 – Apr 2022

- Designed an AI-enabled navigation system, "NaviPath", that supports pathologist workflows by detecting mitoses for tumors in digitized scans
- Planned and facilitated usability testing, using insights to foster collaborative iterations with engineers and create low to high-fidelity prototypes
- Co-authored an HCI research publication about the system, which received an Honorable Mention at ACM CHI 2023

Ipsos – New York, NY (remote)

UX Design Intern, Jun 2021 – Sept 2021

- Conducted detailed research and usability tests for 14 client projects in tech, virtual reality, e-commerce, home appliances, and healthcare
- Transformed the UX team's workflow for competitive analyses, streamlining overall efficiency and delivered results 2 weeks ahead of schedule

Burlingame, CA

Education

San José State University

M.S. Human Factors/Ergonomics,
User Experience (UX)

Received May 2026

University of California, Los Angeles

B.S. Cognitive Science, Statistics
Specialization in Computing

Received Jun 2022

Featured Publication

"Evaluating an AI-enhanced power wheelchair obstacle alert system: Effects of multimodal warning design on warning-response behavior" – Transportation Research: Traffic Psychology and Behaviour, 2026

Recognition

BU Forge Catalyst Designathon –
Honorable Mention, 2022
